Says World Would Be Dull Without "The News"

I think the world would be very dull without any news or newspapers. For a small sum of money we can get news from all over the world everyday through our newspapers. News can travel many ways by phone, by T.V. by radio and other ways.

We are very lucky to have a town paper that we get once a week to tell all the news of our community.

We want to thank our many friends, neighbors, and relatives for their many cards, flowers, gifts, visits, and prayers during the illness and death of our loved one, J. P. Paulette. We shall always remember you all. May God bless you, each and every one. Family of J. P. Paulette. 2-25-1t

IN MEMORIAM

In loving memories of Mrs. Edward D. Cheatham, who passed away a year ago, February 28th. There was never a more wonderful wife and mother.
One who made each hour of every day a rich moment.
She had many friends both near and far
She gained their friendship thru her glowing smile,
If not through her winning personality
When she had fulfilled her task on earth,
God took her to heaven to live with him.
Bitter was the trial to part from one so good as her.
She will never be forgotten as long as life and memory last.
No one can ever fill her vacant place.
—Missed by Edward and daughters. 2-25-1p

It's time to get out the sprayer and check it if you have peach trees and intend to spray this year. If you don't intend to spray, it's a good time to remove them because it's nearly impossible to grow fruit without sprays. Peaches do need a dormant spray of Febam or Lime Sulphur.

Talking about fruits, they do need an annual pruning. It's time this was done. Lesflete can be picked up here on "how to do" if you need them.

The final figures on fire-cured tobacco are out. 9,340,495 pounds were sold for an average of $47.98. This compares with 1963 returned $35.39. It's been a good year for fire-cured tobacco growers. Growers do need to keep in mind the necessity of growing a good crop in 1965. Two things both help and hurt tobacco. Nitrogen and chlorine. Tobacco needs 20 to 30 lbs. of chlorine per acre. Watch the per cent of chlorine in the fertilizer— it shouldn't exceed 2 percent. Excessive amounts of nitrogen injure tobacco. This is not to say that, in general, the rates now used are excessive. But it is an individual farm problem. At least 35 per cent of the nitrogen should be of a nitrate source.

Several days ago, we received a letter from Allen Allison, who does quite a bit of work with soybeans in Eastern Virginia. He outlined a program for a 50 bushel soybean growing contest. There were a number of farmers who grew soybeans in this area last year. Last year, Mr. Rives, near Pamplin, showed me some of the beans he had raised and was saving for seed. He commented that he had a good yield as well as he expected but dry weather interfered. He said, "There's more money in beans than in wheat." I guess he's right. Takes less fertilizer and when you get in excess of $2.50 per bushel it's pretty easy to figure. James Bennet, near Red House, put in some beans last year and tells me he well pleased with his yields. He plans to grow them again this year. More farmers can find this crop to be a good source of income. Getting back to the 50 bushel contest, I don't know if any of our soils will produce 50 bushels. Anyone planning to grow at least 10 acres eligible for the contest. An application form must be filled in and a soil test taken by accompanying the application. First prize is $100.00, so if you are going to grow beans, why not enter the contest.

A lot of people are considering trying plastic covering on their plant beds. There's still a lot we don't know and quite a few management problems need to be worked out. Don't believe I would try it on all beds. Berkley Carrett was quite successful with it in 1964.

* * *

It's time to topdress lawns. We no longer recommend a complete fertilizer in the spring. The complete fertilizer should go on in the fall. Top dress now with 1½ lbs. ammonium nitrate or 2½ lbs. ANL, or 9 lbs. of nitrate of soda. Some homeowners are using urea-formaldehyde 6-6. All the above rates are for 1000 square feet.

A new strawberry variety has been released by North Carolina. It's name — Earlibelle. Reports we get are that it looks quite good. It's expected that Earlibelle will replace Dixieland because of weaknesses it has developed in the past few years.
